Vacancy

3

Job Responsibilities

1. Develop and design RESTful services and APIs with Laravel, MySQL and MongoDB
2. Manage git repository of our web projects
3. Manage and own deployment process (bitbucket and AWS)
4. Create documentation of the application
5. As we serve/sell our services to the third parties via API, s/he needs to know the best practices of API development.

Employment Status

Full-time

Experience Requirements

1. At least 2 year(s)
2. The applicants should have experience in the following area(s):
Amazon AWS, API Development, AWS Lambda, Laravel Framework, MongoDB, MySQL, PHP Laravel, RESTful API.

Salary

50,000 BDT (negotiable)

Read Before Applying

1. Please send updated copy of your resume along with a photo. Including your portfolio/project links will be an added advantage.
2. ** Mention expected salary and earliest joining date. If you're readily available within one/two weeks that will be an added advantage.
